

# New, Emerging and Useful Technologies for Libraries

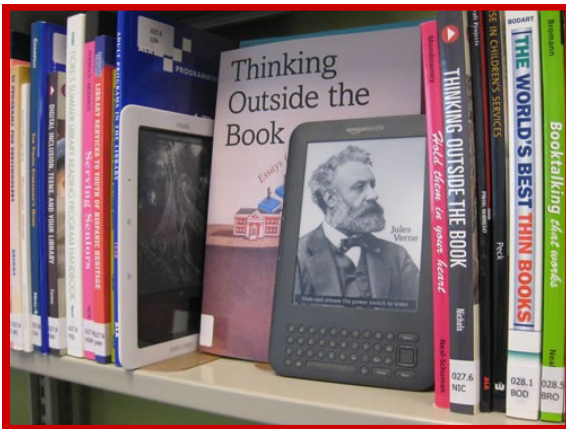

Nov 9, 2010 - Garland South Branch Library

Nov 10, 2010 - Tyler Public Library

9 am — 4 pm

[Sign up here](#)

Presenter, Linda Braun, will cover what technology tools and devices are available, what is coming in the near-future, how to make good decisions about using new technologies for a particular library setting and purpose.

Every day new technologies and new devices are launched. Some are useful to libraries and some are not. In this interactive, hands-on full-day session, participants will learn the uses and positive library implications of:

- Mobile devices such as smartphones and tablet computers
- Access to library catalogs and databases via apps and mobile websites
- eReaders and easy access to reading materials
- Check-in services such as Gowalla and FourSquare

---

## Speed Geeking Anyone?

In the afternoon, take some time to play with the technology at the Tech Petting Zoo. NETLS will have devices available so you can try them out for a hands-on experience.
